More Community

More Community is a community infrastructure platform that helps people build, run and discover real-life communities. We exist to solve a problem that is both deeply personal and structurally significant: the people who run the grassroots communities that hold towns together are overwhelmed, under-supported and relying on a patchwork of disconnected tools.

We are building a single platform — free for community founders — that combines discovery, event management, membership, communication and analytics in one place. At the same time, we give people looking for connection a trusted directory of local groups, events and experiences.

> *"We are not a software company trying to understand community. We are community builders."*

9M+	£2.5B	£150k–250k
LONELY ADULTS IN THE UK	ANNUAL COST OF LONELINESS TO THE UK	CURRENT SEED ROUND

We are raising **£150,000–£250,000** in seed funding to accelerate product development, launch a mobile app and expand our community network beyond Tunbridge Wells into Kent and the South East.

The greatest transformation of my life came through community.

For years I chased achievement through business, endurance sport and personal goals. I competed in Ironman triathlons, completed 12 Months 4 Charity challenges, and pushed myself through burnout again and again — mistaking relentless forward motion for progress. The most meaningful transformation didn't come from crossing a finish line. It came through recovery, honest conversations, men's groups, counselling skills training and the simple, powerful act of walking alongside others.

> *"Achievement changed my circumstances. Community changed my life."*

I trained as a Mental Health First Aider, studied counselling skills and began facilitating men's groups and community walks. Through that process I discovered something that no achievement had ever given me: a deep sense of belonging. More Community was born from that realisation. Not as a tech product looking for a problem — but as a lived experience that revealed a structural gap. When I began building More Community in Tunbridge Wells, the tools problem became impossible to ignore.

THE FOUNDER'S JOURNEY

12 Months 4 Charity
Endurance fundraising, community for a cause

Ironman
Peak performance, but isolated achievement

Recovery
Where the real transformation began

Mental Health First Aid
Trained as a qualified practitioner

Counselling Skills
Trained in listening and human connection

Men's Groups
Creating space for honest, vulnerable conversation

Community Walks
Mindful Miles: the power of simple togetherness

More Community
Platform vision validated through lived delivery

Three interconnected problems. One platform.

PROBLEM 1: THE FOUNDER'S BURDEN

Building More Community exposed a bigger problem.

To run a single community, I needed WhatsApp, Facebook, Instagram, a website, forms, email, analytics, event tools, membership systems and challenge tracking. No single platform existed for community founders.

- WhatsApp & Facebook for communication
- Instagram for promotion
- Eventbrite for events
- Google Forms for RSVPs
- Mailchimp for updates
- Google Analytics for data
- Custom website for credibility

PROBLEM 2: THE INVISIBLE LEADERS

Community leaders are the hidden infrastructure of society.

Every town has walking groups, running clubs, volunteering projects, faith groups, parent groups and entrepreneur communities. The people running them are overwhelmed, under-supported and relying on disconnected tools.

PROBLEM 3: THE DISCOVERY GAP

Communities exist everywhere. Finding them is difficult.

People looking for connection rely on Facebook, Google, word of mouth or luck. Incredible groups already exist in every town — they are simply fragmented and hard to discover.

One platform for founders and seekers.

More Community sits at the intersection of two unmet needs: community founders need better tools, and people seeking connection need a better way to find their people. We serve both from a single, integrated platform.

FOR COMMUNITY FOUNDERS

Everything they need to build, grow and sustain a community — in one free platform. Replace the patchwork of tools with a single, purpose-built ecosystem.

FOR PEOPLE SEEKING CONNECTION

A trusted local directory of communities, events and real-world experiences. Discover walking groups, running clubs, faith groups and more — all in one place, searchable by town.

∞

COMMUNITIES WAITING TO GROW

Everything a community founder needs in one ecosystem.

More Community is built around two interconnected experiences: a powerful set of tools for community founders, and a discovery platform for people seeking connection. The platform is free for leaders — always.

- Discovery Directory
- Event Management
- RSVP Tracking
- Built-in Chat
- Leader Dashboard
- Co-Leadership
- Member Profiles
- Photo Galleries
- Community Microsites
- Broadcasts
- Notifications
- Experiences Marketplace
- Mobile App (Upcoming)

DESIGN PRINCIPLE

We replace a fragmented stack of 8–10 external tools with a single, purpose-built platform. For community founders, this means less admin, more community. For members, it means a simpler, more connected experience.

Product Roadmap & Mobile Strategy

Our web-first approach is deliberate: community leaders manage complex tasks (event creation, analytics, CRM) from a desktop dashboard, while members primarily interact via mobile web. Seed funding accelerates the development of our native mobile apps, transitioning members from web to app while retaining the powerful web dashboard for leaders.

Q4 2026: Foundation

- Experiences Marketplace MVP
- Advanced CRM for Pro Leaders
- API foundation for mobile

Q1 2027: Mobile App

- iOS Beta App Launch
- Push notifications & live chat
- One-tap RSVP & QR check-in

Q2 2027: Ecosystem

- Android App Launch
- NHS Social Prescribing API
- Council Dashboard (Data V1)

The world needs more real-life connection.

The timing for More Community is driven by four converging macro trends:

🏥 PUBLIC HEALTH CRISIS

9 million UK adults report feeling lonely, costing the economy £2.5 billion annually. The structural solution is local community infrastructure.

📉 LEGACY PLATFORMS IN DECLINE

Under-35s are leaving Facebook Groups. More Community is the trusted evolution — purpose-built for local discovery and designed for all ages.

🏃 REAL-WORLD DEMAND

After years of digital saturation, people are actively seeking in-person events, local groups and shared physical experiences.

🏛️ PUBLIC SECTOR NEED

Councils and the NHS need vetted, scalable platforms to support social prescribing, wellbeing programmes and community cohesion.

Built from lived experience. Not market research.

Our competitive advantage is not technical — it is human. More Community is built by someone who has lived the problem, built real communities, trained in wellbeing and experienced the transformation that genuine connection creates.

Founder Credibility

MHFA, counselling skills, community walk leader, facilitator

Real-World Validation

Platform built alongside active community delivery

Free For Leaders

We grow by serving, not charging; driving trust and adoption

Local-First Strategy

Deep density in one town beats shallow presence in a hundred

Founder Empathy

We understand the admin burden because we lived it

Wellbeing-First

We sit naturally within NHS social prescribing frameworks

Mission Alignment

This is not a pivot opportunity — it is the entire vision

Ecosystem Model

We monetise the network around leaders, not the leaders

More than an idea.

More Community is moving from concept to reality. We are currently mapping ecosystems, planning pilot events, and validating our platform architecture to prepare for launch in Tunbridge Wells.

More Community

Initial network mapping in East Sussex and Tunbridge Wells

Community Walks

Mindful Miles pilot sessions in planning phase

Wellbeing Initiatives

Framework designed to deliver measurable local impact

A-Z Challenge

A scalable, replicable community engagement model in development

Local Partnerships

Initial conversations started with aligned local businesses and organisations

Ecosystem Mapped

Initial ecosystem mapping underway in TW

Platform Live

Alpha platform in development featuring discovery, events and leader tools

VALIDATED THROUGH DELIVERY

We have not just built a product — we have built communities. Every feature on the platform was informed by real operational experience running groups, organising events and supporting community leaders.

"We know what community founders need because we are community founders."

Free for leaders. Always.

Our core principle is non-negotiable: community founders never pay to use More Community. This is not a freemium strategy with a paywall behind it — it is a structural commitment that drives trust, adoption and network effects.

> *"We monetise the ecosystem, not the leader."*

Revenue is generated through the value created around active communities — not by taxing the people who create that value. By combining hyper-local sponsorship, an experiences marketplace, premium SaaS tools and B2G enterprise contracts (NHS Social Prescribing), the model supports venture-scale economics targeting £14M+ ARR within 5 years — profitable from Year 2.

REVENUE STREAM	UNIT VALUE	DESCRIPTION	TIMELINE
Local Sponsorship	£13k/town	Micro-sponsorship marketplace where local businesses sponsor individual communities (£75–£350/mo) or full towns (£13,000/yr). Features native feed placements, geo-fenced local perks, and in-store redemptions. Leaders receive 80% of sponsorship fees to fund group activities; More Community retains a 20% marketplace facilitation cut.	Year 1–5
NHS & Council Contracts	£50k/contract	The NHS Long Term Plan mandates social prescribing across all 42 Integrated Care Systems (ICSs). More Community provides the digital infrastructure for these programmes — connecting link workers to community activities. High-margin, sticky B2G revenue with multi-year renewal rates.	Year 2–5
Strategic Partnerships	£60k/partner	Partnerships with health, wellbeing, leisure and lifestyle brands who want access to engaged, active community members at a regional and national scale.	Year 2–5

REVENUE STREAM	UNIT VALUE	DESCRIPTION	TIMELINE
Premium Leader Tools	£49/mo	Leader Pro & Venue Pack (£16.50/mo or £165/yr): 1-Click Council & Venue RAMS generator, digital participant health & safety waivers, verified leader trust shield, and 2% reduced ticket fees (60% discount). ~25% adoption rate across towns (5 leaders/town × £165 = £825 ARR/town).	Year 1-5
Ticketing & Events	£2k/town	Low-friction ticket take rate: 5% on Free tier, discounted to 2% for Leader Pro. Zero attendee booking fees. Stripe card processing (~1.5% + 20p UK) deducted by Stripe directly from leader payouts. Yields ~£2,000 ARR per town on ~£57k annual ticket GMV.	Year 1-5
Council Performance Dashboard	£5k/town	Real-time community health and engagement dashboard for local authorities. Replaces expensive, static community audit reports with live, anonymised data. High-margin recurring revenue that grows with the network without incremental sales effort.	Year 3-5

REVENUE STREAM	UNIT VALUE	DESCRIPTION	TIMELINE
Experiences Marketplace	£3k/town	Community leaders curate and promote day experiences (skydiving, retreats, away days, theatre, wellness) to their groups. More Community earns a 10–15% base commission; leaders choose their own markup on top. Year 1 focuses on single-day experiences; Year 2 expands to multi-day packages. Comparable to Viator/GetYourGuide but driven by trusted community leaders rather than anonymous reviews.	Year 1–5

Experiences Marketplace

The Experiences Marketplace is a commission-based revenue stream that leverages the trust community leaders have with their members. Leaders browse a curated catalogue of local and national experiences — skydiving, spa retreats, theatre tickets, wine tastings, coasteering, pottery workshops — and promote them directly to their community. More Community earns a 10–15% base commission (industry standard for experience aggregators), while leaders set their own markup (typically 5–20%), creating a direct earning opportunity that incentivises promotion.

Year 1 focuses on single-day experiences, priced at an average of £50–£120 per person. From Year 2, multi-day packages (weekend retreats, adventure trips) are introduced, significantly increasing average transaction value. At scale, this stream generates approximately £3,000 per town per year, contributing £1.5M by Year 5 across 500 towns.

WHY THIS WORKS

Community leaders are trusted curators. When a yoga leader recommends a wellness retreat or an adventure group promotes coasteering, members convert at significantly higher rates than anonymous marketplace listings. The leader's endorsement is the marketing — More Community provides the infrastructure.

TIER	PRICE	INCLUSIONS
Headline Sponsor	£5,000/yr	Native video feed posts, dedicated rich-media profiles, featured in-app placement, gamified real-world rewards, and event naming rights
Community Supporter	£2,500/yr	In-app logo, event page presence, geo-fenced local map perks, local directory listing, quarterly impact report
Event Partner	£1,000/yr	Sponsored event badge, event page logo, attendee reach data

BLENDED SPONSORSHIP = £13K PER TOWN

A typical town achieves: 1× Headline (£5k) + 2× Supporter (£5k) + 3× Event Partner (£3k) = **£13,000/year**. This is well within the average UK SME marketing budget of £38k/year (Statista 2025) and delivers measurable local reach that social media advertising cannot replicate.

Platform Pricing

TIER	PRICE	AUDIENCE	FEATURES
Free (Core)	£0 forever	All community leaders	Community creation, events, chat, member management, QR check-in, flyer generator, basic analytics, microsite
Pro Leader	£49/mo	Power users, large groups	Advanced CRM, engagement scoring, export tools, priority event promotion, custom branding, multi-admin, A/B testing on events
Enterprise	Custom	NHS, councils, charities	Social prescribing integration, reporting dashboards, API access, council dashboard, dedicated account manager, SLA

Profitable from Year 2.

The business is designed for capital efficiency. Community leaders do the activation work — More Community provides the tools, sponsors fund the ecosystem. Year 1 is an investment year, covered by seed funding. Year 2 crosses break-even. By Year 3 the business generates £1.47M EBITDA at 67% margin.

5-Year Revenue Model

REVENUE STREAM	UNIT VALUE	YR 1	YR 2	YR 3	YR 5

PATH TO PROFITABILITY

Year 1 is an investment year (£107k burn, covered by seed). Year 2 crosses break-even at 15 towns — validating unit economics before aggressive scaling. By Year 3 the business generates £1.47M EBITDA at 67% margin. The model's capital efficiency comes from community leaders doing the activation work — More Community provides the tools, sponsors fund the ecosystem.

Unit Economics (Per Town)

METRIC	YEAR 2 (15 TOWNS)	YEAR 3 (80 TOWNS)	YEAR 5 (500 TOWNS)
Revenue per Town	£23,133	£25,550	£28,600
Direct Cost per Town	~£3,200	~£1,800	~£1,200
Gross Margin per Town	£19,933 (86%)	£23,750 (93%)	£27,400 (96%)
Community Activation Cost	~£1,500	~£800	~£500
Estimated LTV (5yr)		~£120,000	
CAC (Customer Acquisition)		~£2,500	
LTV:CAC Ratio		48:1	

> *"Once a town is live and active, the economics are extraordinary — 96% gross margin with £28.6k revenue per town per year."*

Retention & Churn Model

METRIC	ASSUMPTION	RATIONALE
Community Leader Churn	15% / yr	Some leaders naturally step down; communities often transition to new leaders rather than closing.
Net Town Churn	5% / yr	Most towns self-sustain once reaching 10+ active communities. To achieve 500 active towns in Year 5, the model requires launching ~525 towns.
Sponsor Churn	20% / yr	SMEs review budgets annually, creating natural turnover.
Sponsor Replacement	80%	High demand for local, targeted community sponsorship fills vacated spots.
Net Sponsor Churn	**4% / yr**	The blended impact of turnover and replacement.
NHS Contract Renewal	90% / yr	In line with enterprise SaaS benchmarks for embedded public sector infrastructure.

Headcount Model

ROLE	YR 1	YR 2	YR 3	YR 4	YR 5	AVG SALARY
Founders / Execs	1	1	2	3	5	£60k
Community Managers	0.5	2	5	12	30	£32k
Sales / Enterprise	0	1	2	5	12	£45k
Developers / Tech	1	2	4	8	15	£60k
Total FTEs	**2.5**	**6**	**13**	**28**	**62**	
Payroll Cost	**£136k**	**£249k**	**£630k**	**£1.25M**	**£2.62M**	

Market Size

Community infrastructure is an emerging category with significant structural tailwinds.

TAM — £4.2B

The global community platform market is projected at $5.3B (£4.2B) in 2026, growing at 13.7% CAGR (Grand View Research). This includes enterprise community platforms, event management and social prescribing infrastructure across developed markets.

SAM — £680M

Our serviceable market is the UK local community infrastructure segment: ~1,800 towns with 10,000+ population, 42 NHS ICSs requiring social prescribing platforms, ~5.5M small businesses spending on local marketing, and the emerging council data insights market.

SOM — £14.3M

Our initial achievable market is 500 towns within 5 years, each generating ~£28.6k blended revenue from sponsorship, ticketing, SaaS, data and experiences. At 500 towns this represents £14.3M revenue — roughly 30% of SOM, with significant room for pricing uplift and new revenue streams.

WHY THIS MARKET IS DEFENSIBLE

Community infrastructure has a powerful network effect: each active community in a town attracts more members, which attracts more communities, which attracts more sponsors. Once a town is "live" with 10+ communities, switching costs become very high — creating a natural geographic monopoly.

No platform does what we do.

The competitive landscape is fragmented. Existing platforms address individual elements of the problem — community building, event management, social networking — but none combine founder tools, member discovery and local community infrastructure in a single, free platform.

Facebook Groups

DISCOVERY & COMMUNICATION

Declining among under-35s, cluttered UX, no dedicated community founder tools, no analytics, no event ticketing.

Edge: purpose-built for founders, clean UX, free tools

Meetup

EVENT DISCOVERY

Charged organisers, transactional model, weak community building tools, no ongoing member management.

Edge: free for leaders always, community-first not event-first

Mighty Networks

COMMUNITY PLATFORM

Subscription-based (charges leaders), designed for online communities, not local real-world groups. No local discovery.

Edge: local-first, free, built for in-person connection

Discord

COMMUNITY COMMUNICATION

Overwhelming for non-tech users, no local discovery, no event management, not purpose-built for real-world communities.

Edge: simple UX, local discovery, integrated event & member tools

Eventbrite

EVENT MANAGEMENT

Transactional, no community layer, charges organisers per ticket, no ongoing member relationships.

Edge: community layer, ongoing relationships, free

WhatsApp / Instagram

COMMUNICATION & SOCIAL

No discovery, no event tools, no member management, no analytics. Used by communities out of necessity, not design.

Edge: we replace the need for both with purpose-built tools

OUR UNIQUE POSITION

More Community is the only platform that simultaneously: (1) gives community founders a complete, free operational toolkit, (2) provides people seeking connection a trusted local discovery directory, and (3) is explicitly designed for real-life, in-person communities — not online groups.

Deep before wide.

We build density town by town. One thriving town with active communities, real leaders and genuine local connection is more valuable — commercially and socially — than shallow presence in a hundred empty locations. This is our foundational strategic principle.

> *"We build density town by town. One thriving community is worth more than a hundred empty directories."*

Tunbridge Wells → Kent → South East → United Kingdom

NOW — 2026 · PHASE 1

Tunbridge Wells: Prove the Model

Map the full community ecosystem. Onboard active local leaders. Deliver community walks, wellbeing programmes and the A-Z Challenge. Build density, local partnerships and platform validation. Use seed funding to accelerate product and grow the local network.

2026-2027 · PHASE 2

Kent Expansion: Replicate the Playbook

Roll out to adjacent Kent towns — Sevenoaks, Maidstone, Canterbury — using the established Tunbridge Wells model. Launch mobile app. Develop first council and NHS partnerships. Build regional sponsorship programme.

2027-2028 · PHASE 3

South East: Regional Platform

Expand across the South East. Build regional partnerships with NHS trusts, local authorities and anchor brands. Establish More Community as the trusted infrastructure for community-led wellbeing and local connection in the region.

2028-2030 · PHASE 4 & 5

National Scale: 500 Towns & Enterprise

Town-by-town expansion accelerating to 500+ towns across the UK. With a proven, high-density network, we deploy B2G enterprise licenses to NHS Integrated Care Systems (ICSs) and local authorities, becoming the default digital infrastructure for UK social prescribing.

The Town Launch Playbook

To achieve our target of 500 towns, we have developed a repeatable, 12–week town launch playbook. In Years 1–3, launches are driven by our regional Community Managers (high-touch). In Years 4–5, we transition to a hybrid model where existing leaders drive organic expansion into adjacent towns via our "Community Accelerator" programme.

PHASE 1: SEED (WEEKS 1-2)

- Identify 3–5 existing community leaders in the town
- Personal outreach and platform onboarding by Community Manager
- Map existing communities (Facebook Groups, council listings)

PHASE 2: ACTIVATE (WEEKS 3-6)

- Leaders create community profiles, list first events
- More Community runs 1 flagship event (e.g., community walk)
- Local press and social media launch campaign

PHASE 3: MONETISE (WEEKS 6-12)

- Approach local businesses for tiered sponsorship
- Connect with council wellbeing/social prescribing team
- Target: 10+ active communities, 3+ signed sponsors

PHASE 4: SELF-SUSTAIN (MONTH 4+)

- Leaders run operations autonomously
- Community Manager shifts to light-touch, regional support
- Sponsor renewals handled by regional sales team

Building the foundation.

More Community is led by a founding team with deep domain expertise in mental health, community facilitation, and product engineering. We are building the foundational leadership required to scale a nationwide platform.

ALEX COLE

Founder & CPO

Qualified Mental Health First Aider, counselling skills practitioner, and active community facilitator. Brings the lived experience and operational playbook required to build real-world communities.

MATT FENTON

Technical Lead

Leading the platform architecture, mobile app development, and data infrastructure. Seed funding will further expand the core engineering team.

ADVISORY BOARD FORMATION

We are actively building an advisory board with expertise in **B2G Enterprise Sales** (specifically NHS procurement) and **Marketplace Scaling**. We are seeking seed investors who can provide more than capital by taking an active advisory role in these critical domains.

Raising £150k – £250k

We are seeking seed investment from people who believe that connection is one of the defining challenges of our time — and who want to back a founder who has lived this problem, built real solutions, and is positioned to scale them.

We are looking for **investors, advisors and strategic partners**. We value networks, expertise and relationships as much as capital.

USE OF FUNDS	DESCRIPTION	PRIORITY
Product Development	Platform features, infrastructure, performance and security improvements	High
Mobile App	Native iOS & Android app — the primary channel for community engagement	High
Community Growth	Onboarding community leaders, expanding the Tunbridge Wells ecosystem and preparing Kent rollout	High
Marketing & Brand	Brand building, content, partnerships and community leader acquisition	Medium
Operational Support	Core team, legal, compliance and administrative foundation	Medium

WHAT WE OFFER INVESTORS

- Equity stake in a mission-driven community infrastructure platform
- Access to a founder with deep community, wellbeing and enterprise experience
- Early position in a market with structural tailwinds (NHS, councils, social prescribing)
- Meaningful impact — this is a business that genuinely improves lives

WHAT WE ASK OF INVESTORS

- Belief in the mission — connection is one of the defining challenges of our time
- Strategic value beyond capital — networks, expertise, introductions
- Patience — we build density, not vanity metrics
- Alignment with our values — free for leaders, community-first, always

> *"Find your people. Experience more. Together."*
