

Commercials & Competitor Analysis

In-depth commercial breakdown, competitive landscape, unit economics and 5-year financial projections.

AUGUST 2026 CONFIDENTIAL V1.0

The commercial case for community infrastructure.

More Community is the platform layer for real-life, in-person community across the United Kingdom. Free for community leaders. Monetised through the ecosystem of local sponsorship, enterprise NHS/council contracts, premium SaaS tools and data insights.

£14.3M	78%	Year 2	500
YEAR 5 REVENUE	YEAR 5 MARGIN	PROFITABILITY	TOWNS BY YEAR 5

KEY THESIS

Community infrastructure is an emerging category. Unlike platforms that charge the people building communities (Meetup, Mighty Networks), More Community monetises the commercial ecosystem around those communities — keeping the platform free and maximising network effects.

Seven revenue streams. Free to launch, monetised at scale.

REVENUE STREAM	UNIT VALUE	DRIVER	YR 1	YR 2	YR 3	YR 5
Local Sponsorship	£13k/town	Towns live	£39k	£195k	£1.04M	£6.5M
NHS/Council Contracts	£50k/contract	Active contracts	£0	£50k	£200k	£1.5M
Strategic Partnerships	£60k/partner	Brand partners	£0	£60k	£180k	£900k

TOTAL REVENUE			**£49k**	**£362k**	**£2.2M**	**£14.3M**

Revenue Stream Analysis

Local Sponsorship (Core — 45% of Yr5 Revenue)

Each town generates ~£13,000/year from 3–4 local business sponsors across tiered packages (Headline £5–6k, Support £2–3k). This is priced well below the average UK SME annual marketing budget of £38,000 (Statista 2025). Sponsors receive branded presence across community events, the local microsite, and in-app placements. This stream scales linearly with town count and is the commercial backbone of the model.

NHS & Council Contracts (Enterprise — 10% of Yr5)

The NHS Long Term Plan mandates social prescribing across all 42 Integrated Care Systems (ICSs). More Community provides the digital infrastructure for these programmes — connecting link workers to community activities. At £50k per contract (below typical NHS SaaS procurement), this is a high-margin, sticky B2G revenue stream with multi-year renewal rates.

Council Performance Dashboard (Growth — 17% of Yr5)

From Year 3, we provide local authorities with a real-time community health and engagement dashboard. Councils currently pay £10k–£20k for static, manual community audit reports; More Community replaces this with live, anonymised data on local connection and wellbeing for £5k per town per year. This represents high-margin recurring revenue that grows with the network without incremental sales effort.

Experiences Marketplace (New — 10% of Yr5)

Community leaders curate and promote day experiences — skydiving, retreats, away days, theatre, wellness — to their groups. More Community earns a 10–15% base commission (industry standard for experience aggregators like Viator/GetYourGuide), while leaders choose their own markup (typically 5–20%), creating a direct earning opportunity that incentivises promotion. Year 1 focuses on single-day experiences; Year 2 expands to multi-day packages. At scale, this stream generates approximately £3,000 per town per year.

Profitable from Year 2.

EBITDA Margin	-219%	8%	67%	74%	78%

PATH TO PROFITABILITY

Year 1 is an investment year (£107k burn, covered by seed). Year 2 crosses break-even at 15 towns — validating unit economics before aggressive scaling. By Year 3 the business generates £1.47M EBITDA at 67% margin. The model's capital efficiency comes from community leaders doing the activation work — More Community provides the tools, sponsors fund the ecosystem.

CHURN MODELLING NOTE

Financial projections include a net town churn of 5% per year, and a community leader churn of 15% per year. To achieve 500 active towns in Year 5, the model assumes launching ~525 towns to account for attrition.

Per-town contribution margin.

Each town operates as a micro-economy. The marginal cost of adding a new town is minimal once the platform and playbook exist — the primary cost is marketing activation and community manager support.

METRIC	YEAR 2 (15 TOWNS)	YEAR 3 (80 TOWNS)	YEAR 5 (500 TOWNS)
Revenue per Town	£23,133	£25,550	£25,600

No platform does what we do.

The competitive landscape is fragmented. Existing platforms address individual elements of community — event management, social networking, communication — but none combine founder tools, local discovery and real-world community infrastructure in a single free platform. Below is an in-depth analysis of eight key competitors.

Nextdoor

DIRECT

HYPERLOCAL SOCIAL NETWORK

The largest neighbourhood network globally. Verified-residency model creates trust but the platform is advertising-driven, creating a cluttered, Facebook-like experience. Limited community tools — no event ticketing, no leader analytics, no community creation workflow.

💰 Revenue: Advertising-led. Neighbourhood Ads, sponsored posts. Users are the product. Recently achieved profitability through AI-powered ad optimisation.

🎯 Our edge: Community-first not ad-first. Purpose-built founder tools. Free for leaders. No advertising clutter.

Meetup

DIRECT

EVENT DISCOVERY PLATFORM

Once the go-to for in-person groups, now suffering from aggressive monetisation since its 2024 Bending Spoons acquisition. Organisers pay subscriptions, members pay ~$2 per RSVP or $5/mo for access. Many organisers are actively seeking alternatives.

💰 Revenue: Double paywall. Organiser subscriptions ($22–35/mo) + member RSVP fees ($2/event) or Meetup+ ($5/mo). Event-first, not community-first.

🎯 Our edge: Always free for leaders. Community-first not event-first. Built for ongoing relationships, not one-off meetups.

Mighty Networks

ADJACENT

ONLINE COMMUNITY PLATFORM

White-label platform for creators building paid online communities. Strong for courses and digital content, but designed for virtual-first communities. No local discovery, no geo features, no real-world event infrastructure.

💰 Revenue: SaaS subscriptions. Community Plan $41/mo, Business $119/mo, Path-to-Pro $360/mo. Plus transaction fees on member payments.

🎯 Our edge: Built for in-person communities, not online courses. Free for leaders. Local-first discovery. Integrated event ticketing.

Circle

ADJACENT

COMMUNITY PLATFORM FOR CREATORS

Modern community platform popular with SaaS companies and creators. Excellent discussion and content features, but fundamentally an online platform. No local community features, no geographic discovery, no event ticketing system.

💰 Revenue: SaaS tiers. Basic $89/mo, Professional $199/mo, Business $399/mo, Enterprise custom. No free tier for community leaders.

🎯 Our edge: Designed for real-world groups, not online forums. Free for community leaders. Location-based discovery that connects people locally.

Discord

INDIRECT

COMMUNICATION PLATFORM

Originally for gamers, now widely used for online communities. Powerful chat and voice features but overwhelming for non-technical users. No local discovery, no event management, no member analytics. Users are anonymous, not verified.

💰 Revenue: Nitro subscriptions ($9.99/mo), server boosts, and recently app marketplace. Free tier is generous but lacks community management tools.

🎯 Our edge: Simple UX for all ages. Real identity. Local discovery. Integrated event management and CRM. Purpose-built for real-world communities.

Hivebrite

ADJACENT

ENTERPRISE COMMUNITY MANAGEMENT

White-label enterprise solution for alumni networks, associations and non-profits. Powerful features but prohibitively expensive for grassroots groups. Implementation timelines of 3–6 months. Not designed for hyperlocal communities.

💰 Revenue: Enterprise SaaS. Starting at ~$895/mo (Connect), with Scale and Enterprise tiers at custom pricing. Plus implementation/setup fees of £5–15k.

🎯 Our edge: Free and instant setup. Built for grassroots community leaders, not enterprise admins. Hyperlocal discovery and sponsorship tools included.

Eventbrite

INDIRECT

EVENT MANAGEMENT & TICKETING

The dominant event ticketing platform. Strong for one-off events but purely transactional — no community layer, no member relationships, no ongoing engagement tools. Each event is isolated with no continuity between them.

💰 Revenue: Transaction fees. 3.7% + £0.79 per paid ticket (UK). Free events are free to list. No community features, analytics or CRM at any tier.

🎯 Our edge: Community layer that creates ongoing member relationships. Free event ticketing with integrated CRM. Leaders keep attendees, not just ticket sales.

Facebook Groups

DIRECT

SOCIAL NETWORK FEATURE

Still the default for many UK community groups, but rapidly declining among under-35s. Cluttered UX, algorithmic feed manipulation, no dedicated founder tools, no event ticketing, no analytics, and growing privacy concerns.

💰 Revenue: Indirect — Facebook Groups are a retention feature for Meta's advertising platform. Groups admin tools are minimal and underfunded.

🎯 Our edge: Purpose-built for founders with analytics, CRM, flyer gen. Clean UX. No ads. No algorithmic interference. Real local discovery.

Competitive positioning matrix.

KEY: ✓ FULL SUPPORT · PARTIAL ✗ NOT AVAILABLE

More Community is the only platform that scores ✓ across all 12 features. The closest competitor (Nextdoor) scores 3/12 with full support. This is because no other platform was designed from the ground up for grassroots, in-person community leaders.

07 MARKET SIZE

The market for real-world community.

£4.2B TAM — GLOBAL COMMUNITY PLATFORM MARKET (2026)

£680M SAM — UK LOCAL COMMUNITY & SOCIAL PRESCRIBING

£14.3M SOM — 500 UK TOWNS × £28.6K REVENUE TARGET

Market Breakdown

TAM — £4.2B

The global community platform market is projected at $5.3B (£4.2B) in 2026, growing at 13.7% CAGR (Grand View Research). This includes enterprise community platforms, event management, and social prescribing infrastructure across developed markets.

SAM — £680M

Our serviceable market is the UK local community infrastructure segment: ~1,800 towns with 10,000+ population, 42 NHS ICSs requiring social prescribing platforms, ~5.5M small businesses spending on local marketing, and the emerging council data insights market.

SOM — £14.3M

Our initial achievable market is 500 towns within 5 years, each generating ~£28.6k revenue from sponsorship, ticketing, SaaS and data. At 500 towns this represents £14.3M revenue — roughly 30% of SOM, with significant room for pricing uplift and new revenue streams.

WHY THIS MARKET IS DEFENSIBLE

Community infrastructure has a powerful network effect: each active community in a town attracts more members, which attracts more communities, which attracts more sponsors. Once a town is "live" with 10+ communities, switching costs become very high. This creates a natural geographic monopoly — the same dynamic that made Nextdoor dominant in neighbourhood social networking.

Freemium done right.

Our pricing philosophy is simple: community founders launch 100% free with full CRM, events, and member chat. Revenue expands organically through the ecosystem: hyper-local micro-sponsorships (80/20 leader split), Leader Pro venue compliance packs (£16.50/mo), low ticket take-rates (5% Free / 2% Pro), and B2G enterprise contracts.

TIER	PRICE	AUDIENCE	FEATURES
Free (Core)	**£0 forever**	All community leaders	Community creation, events, chat, member management, QR check-in, flyer generator, basic analytics, microsite
Pro Leader	**£49/mo**	Power users, large groups	Advanced CRM, engagement scoring, export tools, priority event promotion, custom branding, multi-admin, A/B testing on events
Enterprise	**Custom**	NHS, councils, charities	Social prescribing integration, reporting dashboards, API access, data insights, dedicated account manager, SLA

Sponsorship Tiers (Per Town)

TIER	PRICE	INCLUSIONS
Headline Sponsor	**£5,000/yr**	Logo on all events, featured in-app placement, microsite branding, community newsletter sponsor, event naming rights
Community Supporter	**£2,500/yr**	In-app logo, event page presence, local directory listing, quarterly impact report
Event Partner	£1,000/yr	Sponsored event badge, event page logo, attendee reach data

BLENDED SPONSORSHIP = £13K PER TOWN

A typical town achieves: 1× Headline (£5k) + 2× Supporter (£5k) + 3× Event Partner (£3k) = **£13,000/year**. This is well within the average UK SME marketing budget of £38k/year (Statista 2025) and delivers measurable local reach that social media advertising cannot replicate.

> *"We don't sell ads — we sell authentic community connection. Sponsors become part of the community, not interruptions to it."*
