

BUSINESS PLAN & INVESTMENT MEMORANDUM

more.

Community infrastructure for real-life connection.

A movement dedicated to celebrating and amplifying real-life connections. We empower local community leaders with free tools to discover, organise, and grow — starting in Tunbridge Wells and scaling town by town across the UK.

Stage: Pre-Seed / Seed

Location: Tunbridge Wells, UK

Founded: 2026

Seeking: £150K–£250K

The opportunity in *one page*.

more. is building community infrastructure for real-life connection in the UK. We provide a free platform for local community leaders — the volunteers who organise walking clubs, running crews, faith groups, arts collectives, and entrepreneur meetups — giving them the tools to discover, manage, grow, and sustain their groups.

The Problem

The UK faces a loneliness crisis costing **£32 billion annually**. Meanwhile, the volunteer leaders who bring people together are burning out: forced to pay £17–33/month on Meetup, juggle fragmented tools (WhatsApp + Eventbrite + spreadsheets), and shoulder all the admin alone. There is no single platform that combines community discovery, event management, group chat, analytics, and co-leadership — free for grassroots leaders.

The Solution

more. replaces the entire patchwork of tools with one free platform: a searchable directory, event creation and RSVP management, real-time group chat, leader analytics dashboard, co-leadership promotion, photo galleries, auto-generated community microsites, and direct-to-member broadcast notifications. The core platform is free for all leaders, always.

The Market

Over 500,000 community groups operate across the UK. Our beachhead is Tunbridge Wells (pop. 60,000) where 20+ active groups are already identified. We scale town-by-town — proving density in each location before expanding — targeting 400 UK towns with populations of 20K–150K.

The Business Model

Leaders never pay. Revenue comes from **local sponsorship** (tiered partnerships from £250/event to £5,000/year), **premium features** for larger organisations, **ventures revenue** (YENTW memberships, accelerator programmes), and **council/NHS partnerships** (social prescribing integration, impact data). Unit economics target £15–30K revenue per town at £10–22K contribution margin.

The Ask

We are raising a **£150K–£250K seed round** to fund native mobile app development (40%), community growth across 5 Kent towns (30%), marketing and brand (20%), and operations (10%). This round positions us for £75K+ ARR and a Series A to fund national rollout.

A crisis of connection – and the leaders *carrying the burden.*

The Loneliness Epidemic

The UK is experiencing a loneliness crisis unprecedented in modern history. The COVID-19 pandemic accelerated what was already a growing trend — the erosion of real-life community bonds in favour of shallow digital connection.

£32bn

Annual cost of loneliness to UK

1 in 4

UK adults feel lonely often or always

42%

of 18–24s don't feel part of a community

**£1 =
£16**

Social return on community investment

The UK Government appointed the world's first **Minister for Loneliness** in 2018. NHS England has invested in social prescribing — GPs referring patients to community activities instead of medication. The infrastructure to connect people to these activities, however, remains woefully underdeveloped.

The Hidden Heroes: Community Leaders

Every town in Britain has dozens of vibrant grassroots communities. Behind each one is a volunteer leader who organises everything — often alone, often unpaid, often burning out. These are the people who make communities work, yet the tools available to them are either expensive, fragmented, or invisible.

The "Meetup Tax"

Meetup charges organisers £17–33/month (£200–400/yr). For a grassroots walking group run by volunteers, this is an unjustifiable cost. Many leaders simply don't use platforms at all.

Invisible Discovery

Communities on WhatsApp and Facebook Groups are essentially invisible to newcomers. Growth relies entirely on word-of-mouth. New residents, newcomers to a town, or people seeking connection have no way to find these groups.

Fragmented Tools

Leaders cobble together Eventbrite (RSVPs), WhatsApp (chat), Google Forms (signups), spreadsheets (tracking), and Instagram (promotion). There is no single "home" for a community.

Solo Leader Burnout

68% of community leaders report burnout (NCVO). Communities are "one person deep" — when the leader stops, the community dies. There's no succession planning, no co-leadership enforcement, no admin relief.

The Gap

There is **no single platform** that combines community discovery, event management, group chat, member analytics, and co-leadership tools — **free for grassroots leaders**. This is the gap we fill.

Everything a leader needs. *Free. Forever.*

more. is a full-stack community platform purpose-built for grassroots, real-life community groups. We replace the entire patchwork of fragmented tools with one beautiful, free platform.

Core Platform Features

FEATURE	WHAT IT DOES	REPLACES
 Discovery Directory	Searchable by interest, location, activity. Map view. Category filtering.	Word of mouth
 Event Management	Create, edit, cancel events. RSVP tracking. Capacity limits. Date/time pickers. Cover images.	Eventbrite
 Built-in Chat	Real-time group messaging. Channels. Reactions. Polls. Pinned messages. Image sharing.	WhatsApp
 Leader Dashboard	Member count, pending approvals, activity %, events run. Command centre for all leader actions.	Spreadsheets
 Co-Leadership	Promote members to Co-Leader. Shared admin. Built-in succession planning.	Nothing (gap)
 Photo Gallery	Community moments. Members upload. Social proof for new joiners.	Instagram
 Auto Microsites	Each community gets a public page — hero image, description, events, leader profile. SEO-indexed.	Custom website
 Broadcasts	Push notifications directly to all members. No algorithm. No suppression.	Email newsletters
 Polls & Voting	Community decision-making. Multi-option polls with live results.	Google Forms
 Member Profiles	User profiles with interests, bio, community memberships. Discoverable.	Nothing

The "more." Difference

Free for Leaders. Always.

No trials. No freemium upsells. No credit card ever. We monetise the ecosystem around the leader, never the leader themselves.

Density-First Expansion

We go deep before wide. One thriving town with 20 active communities is worth more than 100 towns with 1 each. We build network effects locally.

Real-Life Focused

We're not building another social network. The screen is the starting point — the event is the destination. Every feature drives in-person attendance.

Leader-First Design

Every feature starts with: "Does this make leading easier?" We protect leaders from burnout with automation, co-leadership, and admin reduction.

Horizontal community infrastructure — *not a niche.*

more. serves every type of real-life community. Our six pillars represent the breadth of human connection, ensuring we're never boxed into a single category.

01

Community Walks

Walk, talk, breathe. Safe spaces for connection outdoors. No pace, no pressure.

02

Challenges

Push your limits together. Gamified tracking, pacing groups, social running.

03

Mental Fitness

Mind, body, purpose. Yoga, breathwork, resilience, emotional wellbeing.

04

Entrepreneurship

YENTW, accelerators, hackathons. Ambitious builders creating together.

05

Events & Meetups

Real-world gathering for every interest. Not networking — connecting.

06

Community Projects

Volunteering, charity, social impact. Giving back, growing forward.

A £2-4 billion *community infrastructure* market.

MARKET LAYER	SCOPE	SIZE	SOURCE
TAM	All UK community groups	£2-4 billion	NCVO, Sport England
SAM	400 UK towns (20K-150K pop.)	8,000-16,000 groups	ONS population data
SOM (Year 3)	30-50 towns in South East	600-2,000 groups	Internal projection
Beachhead	Tunbridge Wells	20+ groups identified	Direct research

Why Tunbridge Wells?

- **Population:** ~60,000 (118,000 borough)
 - **Demographics:** Affluent, educated, high social capital
 - **Active groups:** 20+ identified across walking, running, arts, faith, volunteering, entrepreneurship
- **Local business community:** Strong appetite for community sponsorship
 - **Geography:** Kent hub — natural expansion to surrounding towns
 - **Founder base:** Deep local network and credibility

Market Tailwinds

Post-Pandemic

Record demand for in-person community. People crave real-life connection.

Government Push

Loneliness strategy, social prescribing, Community Power Act — all accelerating.

Gen Z Gap

42% don't use Facebook. They need a modern home for local community.

Who we serve — and *why they care.*

Primary: Community Leaders

Sarah — The Walking Group Leader

Mindful Miles • 124 members • Free group

Runs weekly walk-and-talk sessions. Currently uses WhatsApp for coordination and Instagram for promotion. Spends 3–4 hours/week on admin. No co-leader. Worried about burnout. Wants: discovery, event automation, someone to share the load.

James — The Entrepreneur Network Leader

YENTW • 245 members • £50/yr membership

Organises monthly pitch nights, weekly co-working, and the startup accelerator. Juggles Eventbrite for tickets, Slack for chat, and spreadsheets for tracking. Wants: unified platform, analytics, member management, event tooling.

Margaret — The Volunteer Coordinator

TW Good Neighbours • 320 members • Free

Coordinates local volunteering, food bank sorting, and mutual aid. Relies on phone calls and a Facebook Group (declining engagement). Wants: a way for new volunteers to find them, event RSVPs, and a way to stop being the single point of failure.

Secondary: Community Members

Alex — The Newcomer

Recently moved to Tunbridge Wells • Looking for connection

Just relocated for work. Doesn't know anyone. Googled "things to do in Tunbridge Wells" but found scattered, outdated information. Wants: a single place to discover all active local groups, sorted by interest. Wants to join a walk, a running group, and maybe an entrepreneur network.

Tertiary: Sponsors & Partners

Local Business / Council / NHS

Seeking hyper-local reach and social impact alignment

Local businesses want to reach engaged residents (not passive scrollers). Council and NHS want social prescribing infrastructure. Both want measurable community impact data. Wants: hyper-local brand visibility, community association, and outcome metrics.

more. vs *everything else.*

No single competitor offers the combination of free-for-leaders pricing, full community tooling, and local-first discovery. Each alternative has fundamental weaknesses:

FEATURE	MORE.	MEETUP	FACEBOOK GROUPS	WHATSAPP	EVENTBRITE	DISCORD
Free for leaders	✓ Always	✗ £17–33/mo	✓	✓	✗ Fees	✓
Local discovery	✓ Directory	✓	✗ Algorithm	✗	✓ Events	✗

Group chat	✓ Built-in	✗	✗ Messy	✓	✗	✓
Analytics	✓ Dashboard	✗ Basic	✗ Basic	✗	✓	✗
Co-leadership	✓ Enforced	✗	✓ Admins	✓	✗	✓
Cross-community	✓	✗	✗	✗	✗	✗
Real-life focused	✓ Core	✓	✗	✗	✓ Events	✗ Digital
Gen Z friendly	✓	✓	✗ 42% don't	✓	✓	✓

Competitive Moat

Our defensibility comes from three interlocking factors that are extremely difficult to replicate:

Free-for-Leaders Model

Meetup and Heylo can't copy this without cannibalising their core revenue. We monetise the ecosystem, not the leader.

Local Density Network Effect

Once 15–20 communities are active in a town, cross-community discovery becomes valuable. Members in one group find three more. This compounds.

Leader Lock-In (Positive)

Once a leader migrates their community — members, events, chat history — switching cost is high. And since it's free, there's no reason to leave.

Why Not Just Use Meetup?

Meetup (acquired by Bending Spoons, 2022) is the closest competitor. However, Meetup has fundamental structural issues: it charges leaders (creating a barrier for grassroots groups), has no built-in chat, is US-centric with declining UK presence, and has seen repeated price increases causing organiser backlash. Our free-for-leaders model directly exploits this weakness.

Why Not Just Use WhatsApp?

WhatsApp is the default for many community groups — but it offers **zero discoverability**. You cannot search for WhatsApp groups. A newcomer to Tunbridge Wells has no way to find the local walking group, the running club, or the yoga collective. We solve this discovery gap while providing event tools WhatsApp cannot.

Free core. Monetise the ecosystem.

Leaders never pay. Revenue comes from four complementary streams that grow with community density.

Stream 1: Local Sponsorship & Partnerships (Primary)

Our most immediate and proven revenue source. Sponsorship tiers are already published on the live marketing site.

COMMUNITY Event Sponsor Brand on a specific event. Low commitment entry point. From £250/event	GROWTH Quarterly Partner Ongoing presence across all events. Directory listing. From £1,500/quarter	FOUNDING Annual Partner Year-round premium. Co-branded events. In-app badge. From £5,000/year
--	---	---

Target partners: Local businesses, cafes/restaurants, gyms, venue owners, estate agents, council/NHS, wellness brands, charities.

Stream 2: Premium Features (Future – Year 2+)

Optional paid upgrades for **larger organisations** – not grassroots leaders. The core platform remains free.

- Advanced analytics dashboards and reporting exports
- Custom branding / white-label community microsites
- API access for council and NHS integration
- Priority placement in the discovery directory
- Multi-town organisation management

Stream 3: Ventures Revenue

VENTURE	MODEL	REVENUE (EST.)
YENTW Membership	Annual membership (£50/yr) for accelerator + mentorship access	£12K/yr at 250 members
Startup Accelerator	12-week cohort. Sponsor-funded or fee-based (£500/founder)	£4-6K/cohort
Hackathons	Sponsor-funded 48-hour events. Prize pools + brand exposure.	£2-5K/event

Stream 4: Council & NHS Partnerships

Community infrastructure addresses public health priorities. Revenue via social prescribing integration contracts, community impact data licensing, and grant funding (DCMS, NHS England, Sport England, National Lottery Community Fund).

Unit Economics (Per Town, at Scale)

METRIC	CONSERVATIVE	OPTIMISTIC
Communities per town	20	40
Members per community (avg)	75	100
Total engaged users	1,500	4,000
Local sponsors	5	10
Avg sponsor revenue	£3,000/yr	£4,000/yr

METRIC	CONSERVATIVE	OPTIMISTIC
Revenue per town	£15,000/yr	£40,000/yr
Cost to serve (tech + community ops)	£5,000/yr	£8,000/yr
Contribution margin	£10,000/yr	£32,000/yr

Density first. *Town by town.*

We reject the "spray and pray" model. Instead, we build deep local density in one town before expanding. This creates genuine network effects — members in one community discover three others. It also builds local credibility and attracts sponsors.

The Playbook (Per Town)

STEP	ACTION	TIMELINE
1. Research	Identify 20–40 existing community groups via local knowledge, Facebook, Google, council directories	Week 1–2
2. Seed Leaders	Approach 5–10 most active leaders. Offer free platform, personal onboarding, migration support	Week 2–4
3. Populate	Help leaders create profiles, upload events, invite existing members. Build critical mass.	Week 4–8
4. Launch Event	Town launch event (e.g. at The Pantiles). PR, local press, cross-community gathering.	Week 8–10
5. Sponsors	Approach local businesses with live community data. "X members, Y events, Z engagement."	Week 10–14
6. Sustain	Community Champion (part-time, local) provides ongoing leader support and sponsor management.	Ongoing

Phased Expansion

P1	Tunbridge Wells — Now → Q4 2026 Prove the model. Saturate one town. Onboard 15–20 leaders, 3–5 founding sponsors, validate unit economics. 👥 500 active users • 20+ communities • £15K revenue
P2	Kent Expansion — Q1–Q3 2027 Replicate the TW playbook in 5–10 Kent towns: Sevenoaks, Tonbridge, Maidstone, Canterbury, Ashford. Hire Community Champions. 👥 5,000 active users • 100+ communities • £75K–150K revenue
P3	South East & Beyond — 2028+ 30–50 towns across the South East. National sponsor conversations. Series A positioning. 👥 50,000 active users • £500K–1M revenue • Series A ready

What's next — *12-month plan.*

QUARTER	DELIVERABLES	PRIORITY
Q3 2026	Recurring events, automated reminders, event attendance tracking, leader onboarding wizard	🟢 Core
Q4 2026	Native mobile app (iOS + Android via React Native), push notifications, offline support	🟢 Core
Q1 2027	Advanced analytics dashboard, sponsor portal, community health scoring	🟡 Growth
Q2 2027	Interest-based member matching, social prescribing integration, premium tier launch	🟡 Growth

QUARTER	DELIVERABLES	PRIORITY
Q3 2027	Multi-town management, API for council integration, automated impact reports	● Scale

more.

11 – TRACTION & MILESTONES

What we've already *built and shipped.*

We haven't just written a plan — we've built the platform, launched it, and started onboarding communities. Here's what's live today:

Platform (Live)

- ✓ Full web application — React/Vite frontend, Supabase backend, deployed on Vercel
- ✓ Real-time chat with channels, message reactions, polls, pinned messages, image sharing
- ✓ Event management — create, edit, cancel, RSVP tracking, capacity limits, cover images
- ✓ Leader dashboard with stats, member management, broadcasts, co-leader promotion
- ✓ Community discovery with map view, category filtering, and search
- ✓ Auth system with onboarding flow, user profiles, interest selection
- ✓ Photo gallery with member uploads and community curation
- ✓ Auto-generated community microsites with SEO-indexed public pages
- ✓ Serverless API with image upload to cloud storage

Marketing Site (Live)

- ✓ Premium marketing site with 10+ pages — hero, discover, leaders, sponsorship, ventures
- ✓ Auto-generated community microsites via build script (10 communities live)
- ✓ YENTW venture page with accelerator programme details
- ✓ Sponsorship page with three partnership tiers
- ✓ Hackathons page with event format and structure

Community (In Progress)

- ✓ 20+ community groups identified and profiled in Tunbridge Wells
- ✓ Community data seeded across walking, running, wellness, arts, faith, volunteering, entrepreneurship
- ✓ YENTW venture actively running with regular events
- Leader onboarding conversations in progress
- First sponsor conversations planned for Q3 2026

12 – FINANCIAL MODEL

Conservative *growth projections.*

YEAR	TOWNS	COMMUNITIES	ACTIVE USERS	SPONSORS	REVENUE	COSTS	NET
2026	1	20	500	3–5	£15–25K	£10K	£5–15K

YEAR	TOWNS	COMMUNITIES	ACTIVE USERS	SPONSORS	REVENUE	COSTS	NET
2027	5-10	100-200	5,000	25-50	£75-150K	£60K	£15-90K
2028	30-50	600-1,000	50,000	150-300	£500K-1M	£300K	£200-700K
2029	100+	2,000+	200,000	500+	£2-4M	£1.2M	£800K-2.8M

Key Assumptions

- Average 20-40 community groups per town (validated in TW)
- 5-10 local sponsors per town at £3,000 avg annual spend
- Cost to serve per town: £5-8K (infrastructure + part-time Community Champion)
- Excludes: grant funding, ventures revenue, premium feature revenue, council/NHS contracts
- User growth assumes 75 avg members per community with 60% platform adoption

more.

13 – TECHNOLOGY & ARCHITECTURE

Modern, scalable, *cost-effective*.

The platform is built on a modern serverless stack optimised for rapid iteration, real-time features, and near-zero infrastructure cost at early scale.

Architecture

LAYER	TECHNOLOGY	WHY
Frontend	React 18 + Vite	Fast builds, modern DX, component reuse
Backend	Supabase (PostgreSQL)	Real-time subscriptions, auth, storage, RLS security
Hosting	Vercel (Edge)	Global CDN, zero-config deploys, serverless functions
Auth	Supabase Auth (Magic Link + OAuth)	Passwordless, social login, built-in session management
Storage	Supabase Storage (S3-compatible)	Image uploads, community photos, event covers
API	Vercel Serverless Functions	Service-role operations, image processing
Real-time	Supabase Realtime (WebSockets)	Live chat, instant event updates, notifications

Database Schema

The database consists of 10 core tables with Row Level Security (RLS) policies ensuring data isolation:

- **users** — profiles, interests, onboarding
 - **communities** — groups, locations, metadata
 - **events** — title, description, date, status, capacity
 - **channels** — chat channels per community
 - **messages** — real-time chat with images
- **community_memberships** — roles (Leader, Co-Leader, Member)
 - **event_rsvps** — going, interested, declined
 - **polls / poll_votes** — community decision-making
 - **community_photos** — gallery images
 - **notifications** — event reminders, broadcasts

Infrastructure Cost

SCALE	MONTHLY COST	NOTES
0–1,000 users	~£0	Free tiers on Supabase + Vercel
1,000–10,000 users	~£50–100	Supabase Pro plan
10,000–100,000 users	~£200–500	Scaled compute + storage

14 – RISK ANALYSIS

Risks and *mitigation strategies*.

RISK	LIKELIHOOD	IMPACT	MITIGATION
Leaders don't migrate from WhatsApp	Medium	High	Don't ask them to leave WhatsApp — position more. as the discovery + events layer. WhatsApp handles casual chat; we handle everything else.
Meetup goes free	Low	High	Meetup's revenue model requires paid organisers. Going free would collapse their business. Our local-first + chat + co-

RISK	LIKELIHOOD	IMPACT	MITIGATION
			leadership features differentiate even if pricing matched.
Slow sponsor uptake	Medium	Medium	Validate with 3–5 sponsors in TW before expanding. Council/NHS grants provide alternative revenue if commercial sponsorship is slow.
Community Champion recruitment	Medium	Medium	Start with the most engaged leaders in each town. Part-time roles (8–10 hrs/week) at competitive rates. Leverage university students where possible.
Platform downtime/data loss	Low	High	Supabase provides automated daily backups, point-in-time recovery. Vercel provides 99.99% uptime SLA. All infrastructure is managed/serverless.

Community infrastructure as *public good*.

more. isn't just a technology company — it's a social impact vehicle. Every community we support creates measurable improvements in wellbeing, social cohesion, and local economic activity.

Impact Framework

We measure impact across four dimensions, aligned with the Government's Loneliness Strategy and NHS social prescribing outcomes:

Wellbeing

85% of people report better wellbeing when part of a local group. We track: events attended, communities joined, time spent in real-life activity.

Social Connection

People are 3x more likely to stick to goals when done together. We track: cross-community membership, new connections formed, repeat attendance.

Economic Return

£1 invested in community generates £16 of social return (HACT). We track: events hosted, volunteer hours generated, local business support.

Public Health

Social prescribing reduces GP visits by 28% (NHS). We track: referral pathways, community activity participation, self-reported health outcomes.

Social Prescribing Opportunity

NHS England has invested £1.4 billion in social prescribing — GPs referring patients to community activities instead of medication. The missing infrastructure is a **directory of community activities** that is up-to-date, searchable, and connected to real-time event data. more. is perfectly positioned to become this infrastructure layer.

Grant Funding Pipeline

FUNDER	PROGRAMME	RELEVANCE	AMOUNT
DCMS	Loneliness Strategy Fund	Direct alignment with community connection mandate	£50–200K
Sport England	Together Fund	Physical activity communities (walking, running, yoga)	£10–50K
NHS England	Social Prescribing Innovation	Community activity directory infrastructure	£25–100K
National Lottery	Community Fund	Community-led grassroots infrastructure	£10–500K
Kent County Council	Community Wellbeing	Local community infrastructure support	£5–25K

Impact Reporting

We will publish quarterly impact reports showing: number of communities supported, events facilitated, members connected, and estimated wellbeing value generated. This data serves three purposes: sponsor reporting, grant applications, and council/NHS partnership proposals.

Seed Round: £150K–£250K

CATEGORY	ALLOCATION	SPECIFIC USE
 Product & Engineering	40% (£60–100K)	Native mobile app (React Native, iOS + Android), push notifications, recurring events, automation, analytics engine
 Community Growth	30% (£45–75K)	5 Community Champions across Kent towns (part-time), leader onboarding, migration support, launch events
 Marketing & Brand	20% (£30–50K)	Town launch events, local PR, content creation, partnerships, social media, physical materials
 Operations	10% (£15–25K)	Legal (incorporation, terms, privacy), accounting, insurance, infrastructure scaling

What We're Looking For

- **Angel investors** who believe in community-first businesses and long-term value creation
- **Strategic partners** with networks in local government, NHS, social enterprise, or community development
- **Advisors** with experience scaling marketplace models, town-by-town rollouts, or community platforms

Key Milestones This Round Unlocks

Density Proof

TW fully saturated: 500+ active users, 20+ communities, validated unit economics

Kent Expansion

5 Kent towns onboarded with repeatable playbook and Community Champions

Revenue Validation

£75K+ ARR from local sponsorship across multiple towns

Mobile Launch

Native iOS and Android app. Push notifications. Real mobile-first community experience.

Path to Series A

With seed milestones achieved, we position for a **£1M+ Series A** to fund national rollout. At that stage, we'll have: proven unit economics across 5+ towns, £75K+ ARR, a native mobile app with strong retention, and a repeatable town-by-town playbook. The Series A will fund expansion to 30–50 towns and the build-out of premium features and council/NHS integrations.

Why this exists — and *who's behind it.*

Our Values

Free Forever

Leaders never pay. No trials, no catches, no "upgrade to unlock."

Leader First

Every feature starts with: "Does this make leading easier?"

Real Life

The screen is the starting point, not the destination.

Inclusive by Design

Walking, faith, sport, art, tech, volunteering — all belong.

Local Density

One thriving town > 100 empty cities.
Deep before wide.

Protect Leaders

Co-leadership enforcement, automation, burnout prevention.

The Founder's Story

"For years, I hid behind achievement, unhealthy patterns, and the noise of a life that looked functional on the outside but felt deeply disconnected underneath. I pushed myself through endurance events and Ironman triathlons, constantly running from burnout.

Everything changed when I stopped running alone and started running alongside others. Through shared challenges and honest connection, I found clarity, purpose, and a completely different way of living.

***more.** was built from that exact realisation. It exists to help people step outside their comfort zones, find their people, and share unforgettable experiences in the real world."*

The Vision

Every person in the UK should be able to open one app and instantly see every active community, event, and gathering happening near them — and join with a single tap. We want to make finding your people as easy as ordering a takeaway. **more.** is the infrastructure that makes that possible.

more.

Find your people. Experience more. Together.

Community Directory: *Tunbridge Wells*

The following communities have been identified and profiled as part of our Tunbridge Wells beachhead. These represent a diverse cross-section of community activity types — from fitness to faith, volunteering to entrepreneurship.

COMMUNITY	CATEGORY	EST. MEMBERS	COST	ACTIVITY LEVEL
more. Mindful Miles	 Walking	124	Free	Weekly
TW Ramblers	 Walking	85	£15/yr	Weekly
more. A-Z Challenge	 Running	210	Free	Weekly
TW Parkrun	 Running	540	Free	Weekly
TW Yoga Collective	 Wellness	165	£5/class	3x/week
Kent Adventures	 Adventure	95	Per trip	Monthly
TW Good Neighbours	 Volunteering	320	Free	Weekly
TW Interfaith Network	 Faith	110	Free	Monthly
TW Creative Collective	 Creative	180	Free	Weekly
YENTW	 Business	245	£50/yr	Weekly

Total identified members across 10 core communities: ~2,074

An additional 10+ communities are identified but not yet profiled, including: local cricket club, tennis club, book groups, mum-and-baby groups, elderly lunch clubs, and neighbourhood watch schemes.

Community Categories (Tunbridge Wells)
